## Work Experience

### SimRay Digital | June 2025 - present

#### Full Stack Engineer

Lucknow, Uttar Pradesh

- Building and managing modern web applications by utilizing frameworks and tools to create scalable, efficient solutions, while ensuring high-quality code, security, and seamless deployment processes.

### Next Soft Media | April 2025 - June 2025

#### Web Developer

Lucknow, Uttar Pradesh

- Developed and maintained responsive, user-friendly websites, collaborating with teams to implement interactive features and improve user experience while optimizing for performance, SEO, and cross-browser compatibility.

### True Form Games | Aug 2024 - April 2025

#### Game Developer (Trainee)

Era Medical University, Lucknow, Uttar Pradesh

- As a Game Developer, I build interactive and engaging experiences from the ground up. My expertise includes gameplay programming and performance optimization and I'm highly proficient in Unity and C# I focus on delivering robust and high-performing game features.

## Projects

### SOAR Project: The "Phishing Response Factory"

- Designed and implemented a SOAR solution titled "Phishing Response Factory" to automate phishing incident detection, enrichment, and response. Integrated email security, SIEM, threat intelligence, and ticketing systems to execute automated playbooks for URL and attachment analysis, sender reputation checks, and remediation actions. Reduced manual analyst effort, improved response times, and ensured consistent handling of phishing threats across the organization.

### Student Risk Prediction & Early Warning Dashboard

- Developed a Student Risk Prediction & Early Warning Dashboard as a data analytics project, analyzing academic, attendance, and behavioral data to identify at-risk students early. Performed data cleaning, exploratory data analysis, and KPI development, and built interactive dashboards to visualize risk trends and key indicators, enabling data-driven insights and timely academic interventions.

## Tech Skills

**Front-End:** Nextjs

**Back-End:** REST API

**Databases:** MongoDB

**Version Control:** Git/GitHub

**Deployment:** Cloudflare | Vercel

**Web Analytics:** Sitemap | Google Analytics | SEO

**Cybersecurity:** SIEM Concepts | Sentinel | Threat Analysis
